

WIZ-Kid Steel Drum Deheaders

Manual

FAST, EASY, AND ECONOMICAL MANUAL AND ELECTRIC DRUM DEHEADERS

- Manual or Electric Models
- Leaves Safe Burr-Free Edge
- Deheads 10—50 Drums Weekly
- High Quality, Low Cost

Electric

The **WIZ-Kid[®] Manual** model is a lightweight, portable, and user-friendly deheader designed for low to moderate steel drum volume (10—25 drums per week). It is propelled by an adjustable 18" ratchet, requiring only minimal user effort to reduce the risk of back strain. It will dehead most drums in less than two minutes.

The Manual WIZ-Kid[®] is designed for use in remote areas, where no power source is available, or when drum volume is low and a manual tool is preferred. It is the *only* manual deheader in the industry that leaves a burr-free edge. It can be used left or right handed. These deheaders are built of durable high strength aluminum and hardened tool steel.

Part No.

The **WIZ-Kid[®] Electric** model is a lightweight and user-friendly deheader designed for low to moderate steel drum volume (20—50 drums per week). The self-propelled operation minimizes operator effort and will dehead most drums in less than one minute.

The Electric WIZ-Kid[®] moves itself around the drum, slicing horizontally into the chime, leaving a completely safe drum edge. It uses a 1/8 HP, 115V, 60 HZ single-phase DC motor, and is supplied with a tangle-resistant cord and plug. The unit is quiet, easy to use, and clears all bungs. It can be used left or right handed. These deheaders are built of durable high strength aluminum and hardened tool steel.

Part No. 26BDH4
