Note: USER RESPONSIBLE FOR PERFORMANCE OF CONTAINER	

Specifications show dimensions to which screw caps are normally made. Variability in material may affect final dimensions of a particular lot.

Closure dimensions shown are those which have been found to be functional. Based on industry experience. Because of variability in closure materials and container dimensions, each closure/system should be individually evaluated to ensure it meets applicable performance criteria. Closures having dimensions outside these ranges are also appropriate for use if applicable performance criteria are met. Actual Container dimensions are controlling requirement and must be evaluated to ensure proper fit.
