Low Profile, Modular Spill Decks Allow You To Design And Create A Containment System That Meets Your Specific Needs

Ultra-Spill Decks are available in 1, 2, and 4-drum modules. Modules are easily connected together with bulkhead fittings to allow a virtually unlimited number of customized configurations.

- Polyethylene construction meets a wide range of chemical compatibility needs.
- Low profile, 5 3/4" height offers safe and convenient loading/unloading of drums.
- Applications include hazardous waste collection, storage of virgin chemicals, drum dispensing, and battery storage.
- Optional Loading Ramps provide added drum handling safety and convenience.
- All Ultra-Spill Decks offer slip-resistant grating to reduce OSHA slip hazards.
- Meets SPCC, EPA Container Storage Regulation 40 CFR 264.175, and Uniform Fire Code Spill Containment Regulations.

Shown above – 12-Drum Spill Deck System using the following components: (3) P4 Spill Decks – Part# 1072, (4) Bulkhead Fittings – Part# 1073, (4) T-Strips – Part# 1131 and (1) Ramp – Part# 1089. (Rack, drums and buckets are application props and are not included.)

Bulkhead Fittings allow spills to flow to adjacent sump areas, increasing containment capacity while maintaining a low profile.

Connect your choice of 1, 2, and 4-drum Spill Deck modules to custom-design your own secondary containment storage pad.

6-Drum System

The Bulkhead Fittings not only “lock” connected modules together, but allow spilled liquid to flow from one module to the next.

Ultra-Spill Deck Containment Systems meet SPCC, EPA, and Uniform Fire Code Spill Containment Regulations when assembled in configurations of six (6) drums or more.
