Self-Contained Emergency Eye Wash

Ideal where a continuous supply of water is not available. The self-contained, 10 US gallon, wall-mounted emergency eye wash station delivers a controlled flow of a minimum 0.4 US gallons per minute of potable water for 15 minutes, meeting ANSI Z358.1-2014 requirements.

This slimline, high-visibility orange unit has handles to aid installation and a wide opening for ease of filling. The delivery manifold drains unused water away reducing the risk of stagnating water becoming trapped.

- Wall mounting bracket included
- Removable aerated spray heads
- Optional insulated or heated jackets for outdoor use
- Water preservative additive available to eliminate bacteria
