## Spill Decks

**Low Profile, Modular Spill Decks Allow You to Design and Create A Containment System That Meets Your Specific Needs**

- Spill Decks are available in 1, 2 and 4-drum modules. Modules are easily connected together with bulkhead fittings to allow a virtually unlimited number of customized configurations.
- The bulkhead fittings not only "lock" connected modules together, but allow spilled liquid to flow from one module to the next. Spill Deck Containment Systems meet EPA and Uniform Fire Code Spill Containment Regulations when assembled in configurations of six (6) drums or more.
- All polyethylene construction meets a wide range of chemical compatibility needs.
- Low profile designs 5¾" height offers safe and convenient loading/unloading of drums.
- Applications include hazardous waste collection, storage of virgin chemicals, drum dispensing and battery storage.
- Optional Loading Ramps provide added drum handling safety and convenience.
- Meet EPA Container Storage Regulation 40 CFR 264.175 and Uniform Fire Code Spill Containment Regulations.
