# SONIC BONDED

Ideal for jobs where you need to absorb liquids quickly, the sonic bonded sorbents are constructed from a single layer of high-quality uniform polypropylene fibers. The fibers are then sonically bonded together for added strength and reduced linting. Available in single, medium and heavy weights to suit a variety of spill control and industrial clean-up situations. Pads and rolls are perforated for easy and exact use.

Pads also available in 16" x 20"
