This container may be shipped under Package Classification Item 258 of the National Motor Freight Classification and Test procedures per Rule 40 of the Uniform Freight Classification.

Material

Prime Virgin, FDA Approved, High Density Polyethylene, .090 in. wall thickness.

Construction

The container is molded into one piece with the body tapered to permit one pail to nest inside another for economical storage and shipping. The ears for the Handle (Metal or Plastic) are molded as an integral part of the container.

Cover

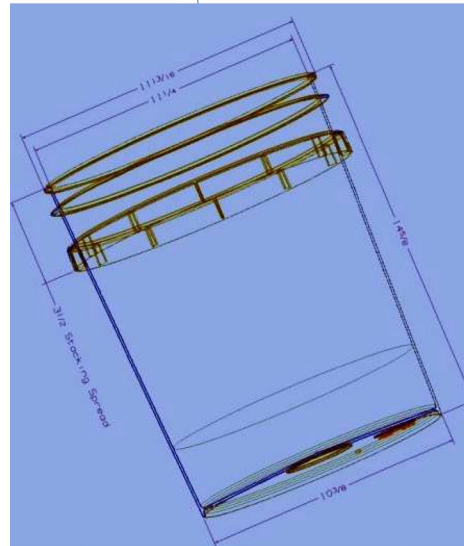

An all plastic cover with a tubular gasket is available with a variety of closures and tamper evident tear-tab.

Testing

Guidelines for use of the pail should be established by the individual fillers taking into account the many variables encountered, such as ambient fill temperatures, stacking arrangements, internal and external pressures, compatibility and permeability.

Packing

42 pails per carton
108 pails per unit
120 pails per unit
