**Conversion Process:**

The manufacturer converts (machine cuts) colored and printed roll stock to customer requested specifications (noted in the product heading).

**Manufacturing Process:**

The product complies with strict manufacturing processes and procedures as developed by the manufacturer and is tested frequently during the conversion process to maintain proper specifications.

**Testing:**

The product has been tested at our facility, both during conversion and prior to shipping, and complies with the customers specifications.

**Shelf Life:**

The product has a shelf life of approximately twelve (12) to fifteen (15) months, when stored at 70 degrees Fahrenheit, from date of shipping.

**Use:**

This product's intended use is for creating tamper evident safety seal around the outside of a container (jar, bottle, other containers, etc.).

**Present Orders:**

All present orders are inspected and comply with our stringent 0 to plus one mm tolerance on product sizing. The Operations Manager leads these inspections and production personnel carry out frequent size to tolerance checks.
