MINI PAK'R Quilt-Air Large Film

MINI PAK'R 8" x 8" Film

MINI PAK'R Supertube Film

PILLOW PAK® Quilt Medium Film
Clear and also in Anti-Stat
(requires Support Arm Kit)

The MINI PAK'R® air cushion machine is a compact system that creates seven different sized air cushions for protecting shipped products. The MINI PAK'R machine offers the small shipper the advantages long-enjoyed by large industrial shippers, superior product protection, ease of operation and cost-savings without having to deal with packing peanuts.

The MINI PAK'R machine saves companies money on shipping and storage costs associated with packaging products. It makes lighter, fuller inflatable packaging on-demand replacing premade bubble, loosefill and paper. The patented, air transfer technology in our quilted and PILLOW PAK® cushions is proven to help reduce damage claims. The MINI PAK'R is ideal for small businesses shipping 1-150 boxes per day. Also perfect for eBay® shippers, and "ship from store" and "return to manufacturer" programs.

Designed with smart technology – reads type of air cushions loaded; automatically sets correct air-fill and sealing temperature.

Our air cushions are made from 100% recyclable material, reduce waste by being 99% air, and can be reused. See www.fpintl.com/sustainable.htm for more information.

Optional Accessories

- Wall Mount Bracket - saves space
- Foot Pedal - allows hands-free use

Optional Wall Mount Bracket

Air cushions are 99% air
