

CONCRETE CURING BLANKETS

Powerblanket® Concrete Curing blankets provide a manageable way to cure concrete effectively and confidently in the cold weather months. Even in warm weather, Powerblanket® Curing Blankets increase production by rapidly curing with consistent, even heat. Year-round applications include: precast, concrete countertops, and decorative concrete.

Why Choose Powerblanket® Concrete Curing Blankets?

- Cure concrete 2.8 times faster than conventional insulated blankets
- Produce cold weather concreting strength of 3,925 in 72 hours
- Maintain moisture throughout hydrating process
- Easily installed and removed
- Prevent a freeze cycle
- Thaw ground and frost from job site prior to pour
- Reduce downtime & increase profitability
- Maintain ACI compliance for cold weather concreting

"We didn't have the time to wait out the winter for the temperatures to become more moderate. The Powerblanket® heating blankets certainly played an important role in keeping us on schedule and not having to postpone the pour on an important Kansas City bridge."

—Dale Helming, Project Manager
Massman Construction
